

WHEELIE BIN SPILL KITS:

ACID SPILL KIT

The Acid Spill Response Kits are designed to contain and neutralise incidental acid spills.

CONTENTS

- 1 x 10Kg AcidNeutria
- 1 x 2m Acid Boom
- 1 x 5Lt OilGone XT (extreme cleaner)
- 1 x Squeegee
- 1 x Broom
- 1 x Non Spark Shovel
- 2 x Pairs Rubber Gloves
- 2 x Face Shields
- 2 x Safety Goggles
- 5 x Disposable Bags with Cable Ties
- 1 x Mutton Cloth
- 1 x Roll Chevron Tape

USER'S PROCEDURES

ALL ACID SPILL RESPONSE KITS MUST ONLY BE USED FOR ACID SPILL CLEAN-UPS AND NOT FOR ANY OTHER CLEAN-UPS AS INCOMPLETE KITS WILL PREVENT THE USER TO PERFORM AN EFFECTIVE AND EFFICIENT CLEAN-UP.

1. Identify the source of the spill and rectify the situation as soon as possible.
2. Locate the spill kit and move to the spill site.
3. Break the bin seal to gain access to equipment.
4. Put on personal protective equipment, i.e. face shield and gloves.
5. Use the acid boom (1x2m long flexible sausage shaped boom) to stop the spread of acid. Place the boom in the path of the acid as it spreads.
6. AcidNeutria will react and neutralize acids and will absorb the liquids.
7. Spread AcidNeutria over spilt acid in a thick layer to cover the acid completely and leave for 15 minutes.
8. Use the broom to sweep the AcidNeutria back and forth over the spill area.
9. Once all the acid has been absorbed (wait 30 minutes), use the squeegee to collect the powder together and place it in disposal bags by using the shovel.
10. Scoop up the remaining residue using the shovel and place it in the disposal bags.
11. Pour OilGone XT over the contaminated area and agitate it lightly with the broom or brush. Leave for 5 to 10 minutes to clean the area.
12. Apply water and use the broom to wash the residue away to disposal.
13. Clean all equipment.
14. Seal the disposal bags with cable ties and dispose of according to regulations.
15. Return all equipment to the wheelie bin and contact the person responsible to replace the used contents and re-seal the bin.

NB. ALL PERSONNEL MUST BE FAMILIAR WITH THE LOCATION (YELLOW BIN CLEARLY MARKED SPILL RESPONSE KIT: ACID) AND APPLICATION OF SPILL RESPONSE KITS. THIS IS TO ENSURE SAFE AND PROMPT SPILL CLEAN-UPS.
