- 1 x Pair of Safety Gloves
- 1 x Safety Goggles
- 1 x Mask
- 1 x Mutton Cloth
- 2 x Disposable Bags with
Cable Ties
- 1 x Chevron Tape

USER'S PROCEDURES

The Acid Spill Response Kits are designed to contain and neutralize incidental Acid spills on hard surfaces.

ACID RESPONSE KITS MUST ONLY BE USED FOR ACID SPILL CLEAN-UPS AND NOT FOR ANY OTHER CLEAN-UPS AS INCOMPLETE KITS WILL PREVENT THE USER TO PERFORM AN EFFECTIVE AND EFFICIENT CLEAN-UP.

ACTION

1. Identify the source of the spill and rectify the situation as soon as possible.
2. Locate the spill kit and move to the spill site.
3. Unzip the bag.
4. Wear the personal protective equipment, i.e. goggles, mask and gloves.
5. Use the absorbent boom (2m long flexible sausage shaped boom) to stop the spread of Acid. Place the boom in the path of the acid as it spreads.

HARD SURFACES

6. Spread AcidNeutria over spilt Acid in a thick layer and ensure that the Acid is completely covered.
7. Use the brush to sweep the AcidNeutria back and forth over the spill area to allow the absorbent product to absorb and neutralize the acid.
8. Once all the acid has been absorbed (wait 30 min), use the brush and pan to scoop the contaminated waste up and place in disposal bags.
9. Apply OilGone XT degreaser over the contaminated area and agitate it lightly with the brush.
10. Leave the degreaser for 5 to 10 minutes to further neutralize the remaining acid.
11. Apply water to wash the residue away.
12. Place boom in disposal bag.
13. Clean all equipment with mutton cloth and return to bag.
14. Seal the disposal bags with cable ties and dispose of according to regulations.

FINALLY

15. Return all equipment to the bag and contact the person responsible to replace the used consumables and re-seal the bag.
