Simply Perfect

Series 7

The SERIES 7 entry panel from LEGRAND offers pure quality at your fingertips. Slender, stylish, skillfully contoured, robust and durable, quite simply it's perfect.

The all weather call buttons combined with aluminium facia ensure a long lasting product suitable for both inland and coastal conditions.

Long lasting, high efficiency diodes light up the call button labels improving usability in dark conditions.

Easy installation and battery back-up

Operating off a 12V AC/DC power supply, the entry panel can be connected directly to a 12V gate motor with battery back-up, not only simplifying installation but also providing power failure protection.

The panel hinges open for convenience and the high quality connectors allow easy and reliable termination of all wiring to the panel.

Excellent expandability

The LEGRAND Series 7 system is fully expandable. The modular design allows configuration of entry panels with any number of call buttons in even number increments. Each call button can be connected to four handsets.

The SERIES 7 handset with contemporary styling and ergonomic feel confirms the superior quality of the product. The handpiece is available in a range of exciting colours, complimenting any interior.

Secure your entrance

The superior voice quality of the LEGRAND intercom system allows you to identify your visitor with confidence before letting them into your property.

Use the convenient gate/door release pushbutton on the handset to operate the entrance gate or front door lock. An extra pushbutton is provided as standard on each handset to operate an auxiliary function on the gate operator or switch a light outside the front door.

A well engineered product offering easy installation and superior quality

domestic kits

Note: - n = NUMBER OF CALL BUTTONS USED

50m	2 x 1mm ²	(4+n) x 0,2mm ²
100m	2 x 1,5mm ²	(4+n) x 0,2mm ²

DESCRIPTION
