To whom it may concern

This serves to confirm that Sehwai Exploration Drilling (Pty) Ltd provided drilling services to Platreef Resources's Mokopane project. The drilling program entailed NQ-core size holes, drilled at an angle of  $-85^{\circ}$  to depths of up to 1200m in the Northern Limb of the Bushveld Complex.

Sehwai started drilling on the 23<sup>rd</sup> July 2011 with one CS 14 drill rig. They added a second CS 14 drill rig on the 1<sup>st</sup> September 2011 and stopped drilling on the 11<sup>th</sup> November 2011. They drilled a total of 7705.17m during that period and one of their drill rigs reached a peak of 1 661m in October 2011.

Sehwai has demonstrated full capability of executing above described work and I would recommend them for similar drilling projects.

Regards

Sello Kekana
